RATIONALE At present there is no Ukrainian history course at CSI, although there are several 200- and 300-level Russian history courses. This course makes a significant contribution to understanding the history of Ukraine and the entire region including Russia. It will help students comprehend the decolonization process in the Ukrainian-Russian relationship and provide a historical background to the contemporary Russian-Ukrainian war. This course will be offered every other academic calendar year and as needed. This course will be added to the list of existing courses. As there is an expectation of significant developmental writing at the 200 level, a course cap of 35 is appropriate.

Include when the course will be (every semester or every other semester) and the expected enrollment (how many students will register per semester).
