The Master of Arts in Clinical Mental Health Counseling program is registered with New York State as a licensure qualifying program and is based on the model recommended by the Council for Accreditation of Counseling and Related Education Programs (CACREP).

Under New York State Education Law Article 163, the practice of mental health counseling includes:

- the evaluation, assessment, amelioration, treatment, modification or adjustment to a disability, problem, or disorder of behavior, character, development, emotion, personality or relationships by the use of verbal or behavioral methods with individuals, couples, families, groups, in private practice, or organized settings; and
- the use of assessment instruments and mental health counseling and psychotherapy to identify, evaluate and treat dysfunctions and disorders for purposes of providing appropriate mental health counseling services.

DEGREE REQUIREMENTS

The Master of Arts in Clinical Mental Health Counseling is a 60-credit 2 ½ year program. The curriculum is composed of 16 courses as well as one practicum and three internship courses (for a total of 700 hours of fieldwork experience).
