Accessing CSI’s Wireless System

The Office of Information Technology Systems provides wireless access for the College community. This service is available campus wide. CSI’s Wireless Broadcast System is ‘CSI-Wireless.’ Your wireless device will need to be configured to gain access to the wireless network.

1. Depending on the wireless device, Wi-Fi connectivity needs to be enabled.
2. The Wi-Fi Utility installed on your wireless device will see various connection settings (i.e. CSI-Wireless, CSI-GUEST, ClearPass SSID, etc.)
3. You must select CSI-Wireless in order to connect to the wireless network

![Image of Wi-Fi Connection Utility]

This is an example of a ‘Wireless Wi-Fi Connection Utility’. This utility varies with the wireless device.

Choose ‘CSI- Wireless’ to connect to the wireless network.

4. Once connectivity has been established, open an internet browser (Internet Explorer, Mozilla Firefox, Safari, etc.).
5. The internet browser home page will be automatically directed to the Wireless Login Page.
6. Log in with your credentials.

To logon to the wireless system, the user is required to type in a Username and Password.

- Faculty and Staff will utilize their FLAS credentials.
- Students will utilize their SLAS credentials.
- Guests will utilize user name and password provided by event coordinator

Note: Your FLAS and SLAS credential is the username and password you use to log on to computers on campus (firstname.lastname)

Only one device can be connected. If you want to connect an alternative device you need to logout of the device you are currently using.

If you experience any problems while attempting to configure your device, please contact us at the Technology Helpdesk at 718-982-3695 or visit us 2A-306.
