Department: Workforce Development and Innovation, CUNY College of Staten Island
Reporting to: Director, Workforce Development and Innovation
Functional Title: Web Development Instructor
Payroll Title: Continuing Education Teacher
Schedule: 6 hours/week; January 2021 – May 2021
Salary: $60-$75/hr

General Description:
Grounded in the Liberal Arts tradition, the College of Staten Island is committed to the highest standards in teaching, research, and scholarship. Drawing on the rich heritage of the City University of New York that has provided access to excellence in higher education since 1847, the College of Staten Island offers that same opportunity in New York City’s Borough of Staten Island. The College is dedicated to helping its students fulfill their creative, aesthetic, and educational aspirations through competitive and rigorous undergraduate, graduate, and professional programs. We embrace the strength of our diversity, foster civic mindedness, and nurture responsible citizens for our city, country, and the world.

The Office of Workforce Development and Innovation develops workforce training programs designed to address critical skill gaps in high growth industries. Workforce Development provides quality, flexible and cost effective training to support the educational and training goals of individuals and organizations. We offer certificate programs and professional development courses in the healthcare, technology and business sectors. Our department draws upon the expertise of faculty and subject matter experts to deliver quality training programs.

The College of Staten Island’s Office of Workforce Development and Innovation is seeking a part-time Web Development instructor to provide instruction in basic web development for a grant-funded technology education program. The program provides training for a diverse group of out-of-school/out-of-work young adults to prepare for a variety of jobs or pursue additional training or postsecondary education. The Web Development Instructor will work closely with our Curriculum Developer and be responsive to our community partner, to ensure each student receives a high-quality learning experience, to support their success in our partner’s bootcamp program. This is a temporary position, designing curriculum and teaching a class that will meet during the day for up to 6 hours a week for up to four months from January to April/May of 2021. The successful candidate will meet scheduled deliverables to build the curriculum beginning in November, creating a solid curriculum and course syllabus under the supervision of the Curriculum Developer.

Key Responsibilities

- In partnership with the Workforce Development team, develop a robust curriculum which gives students an introduction to web development principles including HTML, CSS, and basic JavaScript along with commonly used frameworks and tools
- Create assessment and intake tools to identify those students who would mostly likely benefit from and succeed in the program
- Provide instruction to a diverse class of students and create a safe, supportive, and motivating classroom environment
• Create a sequence of hands-on, skill-building activities to guide students through 100 hours of independent project lab work, introducing time-management and study skills to keep these students on task and on track
• Provide regular feedback and evaluate students’ performance of course objectives and provide feedback to students and program
• Support program’s objective of immersing students in the real-world tech work environment by keeping up to date on industry trends and events and bringing this knowledge to the classroom
• Work closely with the program partners to prepare students for higher education and employment
• Monitor and report on student progress and outcomes.
• Participate in regular meetings with team members to discuss students’ progress and to identify areas of extra support needed
• Other duties as assigned

Qualifications

• Bachelor’s degree
• Master’s degree and/or professional certifications are a plus
• Demonstrated experience in HTML/CSS and JavaScript design concepts and commonly used tools and frameworks
• 1-2 years’ teaching and/or training experience in a technology-related field
• Experience working with young adults from disadvantaged populations with barriers to education
• Passion for and commitment to working with groups who have been traditionally underrepresented in the technology sector
