The City University affirms its continuing commitment to drug, tobacco, and alcohol education on campus. It is committed to the development of educational and support programs directed toward the use and abuse of drugs, tobacco, and alcohol, whether legal or illegal.

The inappropriate use of alcohol and other drugs threatens the health and safety of students, employees, their families, fellow students, and the general public, as well as repairs performance. In addition to promoting health, safety, and a positive learning and working environment, the City University is committed to preventing alcohol- and other drug-related problems among all members of the University community.

The unlawful possession, use, or distribution of alcohol or other drugs by anyone, either on University property or at University-sponsored activities, is prohibited. Any person who is determined to have violated this policy will be subject to intervention by City University officials.

As a condition of employment, an employee of The City University must notify his/her supervisor if he or she is convicted of a drug-related offense involving the workplace within five (5) days of conviction. The University is required to notify the appropriate granting or contracting federal agency within ten (10) days of receiving notice of any such conviction. (Drug-Free Workplace Act of 1988)

This policy and its requirements are consistent with The City University’s desire to promote health and safety, and are in accordance with the requirements of the Drug-Free Workplace Act of 1988 and the Drug-Free School and Community Act Amendments of 1989.

Students are expected to comply with the Campus Behavior Code printed in the Undergraduate Catalog and The Gazette.

A student who is experiencing difficulty with alcohol or chemical dependency may be referred to the Vice President for Student Affairs or the appropriate counseling center by members of the instructional staff or may seek assistance directly. The Vice President for Student Affairs may take disciplinary action or recommend that the student meet with a counselor for appropriate referral or assistance through self-help organizations or other outside intervention agencies.

At the College of Staten Island, no alcoholic beverages of any kind may be served to students on campus without the written permission of the Vice President for Student Affairs. Such permission will be granted only if attendance at the event is limited to individuals 21 years of age or older. At these events, the sponsoring organization will be required to legally proof (double identification) all persons seeking admission to the event.

Sanctions

INSTITUTIONAL: The unlawful manufacture, distribution, dispensation, possession, or use of illegal drugs or other controlled substances and the unauthorized use of alcohol by University employees in the workplace is prohibited.

Employees found in violation of the standards of conduct referred to in this policy may be subject to discipline under the provisions of their union contract(s). Sanctions that may be imposed include, in addition to those found in the various contracts, verified attendance and successful participation in a drug/alcohol assistance program.

STATE AND FEDERAL: Both federal and state law make it a criminal offense to manufacture, distribute, or simply possess a controlled substance.

The New York State Penal Law makes it a criminal offense to possess, possess with intent to sell, or actually sell various drugs. The drugs to which this law applies include marijuana and those listed in the schedules contained in the New York Public Health Law section 3306. The possible sanctions for violation of federal or state law depend upon the particular offense. The various offenses are premised upon aggravating factors, including the type and quantity of drugs involved. Sanctions range from community service to monetary fine and/or imprisonment.

It is a violation of New York State Penal Law section 240.40 for a person to appear in public under the influence of narcotics or a drug other than alcohol to the degree that the person may endanger him or herself or other persons or property, or annoy persons in his/her vicinity. It is also a violation of New York State Penal Law section 260.20 (2) for a person to give or sell an alcoholic beverage to a person less than 21 years old.

Any person who operates a motor vehicle while intoxicated or while his/her ability to operate such vehicle is impaired by the consumption of alcohol or drugs, in violation of Vehicle and Traffic Law section 1192, is subject to suspension or revocation of driving privileges in the state as well as a fine and possible imprisonment. These begin at $300 to $500 in fines and/or up to (15) days in prison, plus a 90-day suspension. In addition, under New York State Civil Practice Law and Rules sections 1311 and 1321, seizure and forfeiture of vehicles driven while impaired or intoxicated is also possible.

### COMMON DRUGS: SYMPTOMS & USES

<table>
<thead>
<tr>
<th>DRUG</th>
<th>DRUG NAME</th>
<th>STREET NAME</th>
<th>METHOD OF USE</th>
<th>SIGNS &amp; SYMPTOMS</th>
<th>HAZARDS OF USE</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Cocaine</strong></td>
<td>A stimulant drug.</td>
<td>None</td>
<td>Coke, Snow, Toot, Blow Rock, Crack</td>
<td>Most often smoked or inhaled; also injected or swallowed in powder, pill, or rock form.</td>
<td>Restlessness, irritability, anxiety, talkativeness. Diluted pupils, slurred speech. Intense psychological dependence; sleeplessness, nervousness, cardiovascular effects &amp; death from overdose.</td>
</tr>
<tr>
<td><strong>Designers/Rave/Club Drugs</strong></td>
<td></td>
<td>MDMA (methyleneoxy-methamphetamine)</td>
<td>Ecstasy, XTC, ADDAM</td>
<td>Most often taken orally, sometimes snorted and rarely injected.</td>
<td>Blurred vision, chills/sweats, increased heart rate, blood pressure, nausea, muscle tension, rapid eye movement, dilated pupils. Anxiety, depression, severe mood swings, paranoia, sleep problems, psychosis &amp; violence.</td>
</tr>
<tr>
<td><strong>GHB</strong></td>
<td>(Gammahydroxybutyrate)</td>
<td>Soap, Liquid Ecstasy, Liquid X, Scoop, G</td>
<td>Taken orally, rarely injected.</td>
<td>High doses-interference with mobility, dizziness, induces sleep, drowsiness. Slower respiration &amp; heart rate, drop in temperature, temporary amnesia &amp; coma.</td>
<td></td>
</tr>
<tr>
<td><strong>Hallucinogens</strong></td>
<td>Drugs that alter perception of reality.</td>
<td>PCP (Phencyclidine)</td>
<td>Dust, Super-grass, Crystal, Emulming Fluid</td>
<td>Most often smoked, can be inhaled (snorted), injected, or swallowed in tablets.</td>
<td>Hallucinations, confusion, disorientation. Confusion, agitation, aggression.</td>
</tr>
<tr>
<td><strong>Inhalants</strong></td>
<td>Substances abused by sniffing.</td>
<td>LSD</td>
<td>Acid, Cubes, Purple Haze, Tabs, Blotter, Memo Dot, Dip</td>
<td>Usually swallowed in liquid form.</td>
<td>Dilated pupils, sweating, trembling, illusions, hallucinations, mood swings.</td>
</tr>
<tr>
<td><strong>Marijuana</strong></td>
<td>Hashish</td>
<td>Tetrahydrocannabinol (THC)</td>
<td>Pot, Grass, Blunt, Joint, Wood Sticks, Herb, Split, Dope, Tea, Buddha, Chronic</td>
<td>Most often smoked, can also be swallowed in solid form (baked in cookies).</td>
<td>Sweet, burnt odor; red eyes; lethargy; lack of coordination. Chronic heavy use may lead to loss of appetite, weight loss, psychological &amp; physical dependence.</td>
</tr>
<tr>
<td><strong>Narcotics</strong></td>
<td>Natural or synthetic drugs that contain or resemble opium.</td>
<td>Dihidral, Percodan, Demerol, Vicodin, Percocet, Darvocet, Oxycotin</td>
<td>Dogs, K-4, Vikes, Killers, OC, Oxy, Norco</td>
<td>Swallowed in pill or liquid form.</td>
<td>Drowsiness, lethargy; constipated pupils, slurred speech.</td>
</tr>
<tr>
<td><strong>Sedatives</strong></td>
<td>Depressant drugs that slow the down the central nervous system.</td>
<td>Benzodiazepines</td>
<td>Valium Xanax Halcion</td>
<td>Swallowed in pill or form injected.</td>
<td>Drowsiness, confusion, impaired judgment, slurred speech, needle marks, constipated pupils.</td>
</tr>
<tr>
<td><strong>Steroids</strong></td>
<td>Synthetic hormones that promote protein storage and tissue growth.</td>
<td>Anabolic Androgenic Steroids</td>
<td>Juicy, Rhoids</td>
<td>Orally in tablets or injected.</td>
<td>Irritability, increase in lean muscle mass, increased stamina for training, impaired judgment, acne.</td>
</tr>
<tr>
<td><strong>Stimulants</strong></td>
<td>Stimulate the central nervous system.</td>
<td>Ritalin, Adderal, Amphetamines, Dextroamphetamine, Methamphetamine, Biphetamine</td>
<td>Jef, Skippy, Vitamin R, R-Hall, Speed, Uppers, Pop Pills, Benning, Ice, Dextes, Meth, Crank, Crystal</td>
<td>Smoked or swallowed in pill or capsule form; also injected, some are crushed and snorted.</td>
<td>Excess activity, irritability, restlessness, nervousness &amp; mood swings. Diluted pupils; needle marks.</td>
</tr>
<tr>
<td><strong>Cough Suppressants</strong></td>
<td></td>
<td>Dextromethorphan</td>
<td>DXM, Dex, Robo, Skittles, Triple C, Tussion D</td>
<td>Swallowed in pill or syrup form</td>
<td>Slurred speech, disorientation, loss of coordination, vomiting. Hallucinations, confusion, dizziness, blurred vision, rapid heart beat. Tylenol in syrup may cause liver damage.</td>
</tr>
