Summer STEM Bridge Program @ CSI St. George

To explore majors in education, science, math, engineering, technology and health care

July 13–15, 2021

- Are you excited about the transition from high school to college?
- Do you want to meet and network with other peers entering the College of Staten Island?
- Are you interested in exploring fields such as Geo-mapping, engineering, education, biology, public interest tech and health care?
- Do you want to know about careers such as accounting, actuary science, civil engineering, high school teaching, nursing, chemist, tech entrepreneurship, and others?
- Do you want to know what courses in math and science look like for college freshman?

Join faculty and staff this summer at the College of Staten-St. George for a pre-college STEM Summer Bridge Program.

This FREE program will consist of:

- Meeting and networking with peers also preparing to enter college
- Attending workshops taught by college faculty focused on the joy of studying STEM
- Spending time IN PERSON with peers in a laid back, non-pressure environment

Eligibility:

- Recent graduate of Curtis, Port Richmond or McKee High School
- Planning to attend the College of Staten Island in Fall 2021
- Interested in pursuing study in science, math, technology, education and/or health care professions
- Available to attend all 3 days of the workshops (July 13th, 14th and 15th, from 9am-1pm)**

**those unable to attend all 3 days will be put on a waitlist and admitted if seats are available

All participants will receive a voucher for $50 each day of participation, up to $150.00, for use in the CSI Bookstore to help successfully begin freshman year. These will be distributed at the beginning of the semester with enrollment at CSI.
