Accessing the Virtual Desktop for Accessibility Software from ON Campus

1. Login to the computer, and click on the **Virtual Desktop** icon.

2. Login in with your CSI ID and password when you see the VMware Horizon Air Platform Desktop Portal. An example is shown below:

3. Your screen will now show the following window:

4. Next to **Accessibility**, click on **Desktop**.
5. The following window will appear:

![External Protocol Request]

Google Chrome needs to launch an external application to handle vmware-view: links. The link requested is vmware-view://cuny.horizon.vmware.com/CSC126?
desktopProtocol=PCOIP&connectUSBOnStartup=true&connectUSBOnInsert=true&SAMLart=NTgzMmU2NWEtOTkwOS00MTYkLWJmMGItMzAxZWYwMjYzOWI5.

The following application will be launched if you accept this request:

"C:\Program Files\VMware\VMware Horizon View Client\vmware-view.exe" /cuny.horizon.vmware.com/CSC126?
desktopProtocol=PCOIP&connectUSBOnStartup=true&connectUSBOnInsert=true&SAMLart=NTgzMmU2NWEtOTkwOS00MTYkLWJmMGItMzAxZWYwMjYzOWI5"

If you did not initiate this request, it may represent an attempted attack on your system. Unless you took an explicit action to initiate this request, you should press Do Nothing.

- Remember my choice for all links of this type.

[Launch Application] [Do Nothing]

6. Click the check box next to **Remember my choice for all links of this type**, and click on **Launch Application**.

7. The following window will briefly appear.

![VMware Horizon Client]

The Connection Server is preparing the desktop...
8. When you see the following window, click OK:

9. Please wait while the system “prepares your desktop.”

10. You will soon arrive at the desktop. By clicking on the **Kurzweil or ZoomText** shortcut, you can start using the program.
NOTES:

1. The system will disconnect you if there is 1 hour of inactivity.

2. Save any work on an external device (USB, external hard drive) or your local machine. Data will NOT be stored on the Virtual machine.

11. If you need to go toggle back to your local computer, you can use the Windows + TAB keys or just move the mouse to the top of your screen, and a small header will appear that shows the standard minimize/restore buttons, as shown below:

12. To exit the Virtual machine, Logoff using the Start button as you would from any PC. **DO NOT** click on the button on the upper right hand corner of your screen.
13. You screen will once again look like the following:

14. Click **Logout** (on the upper right hand corner) to exit the system.
