

Required Verrazano Spring Schedule for Computer Science Majors

The 4- or 5-digit section numbers for Verrazano Honors classes change each semester (and occasionally the times change). View the updated list of Verrazano sections at <https://www.csi.cuny.edu/academics-and-research/specialized-programs/honors-programs/verrazano-school/program-requirements/courses>.

You must take the following Verrazano courses:

- (1) **Honors ENG 151:** College Writing (3 credits); M/W 10:10-12:05
We will sign you up for this

- (2) **Honors MTH 130:** Precalculus – 3 credits; **MTH 231/229:** Calculus I – 4 credits total; or **MTH 232:** Calculus II – 3 credits – all are on a M, W 12:20-2:15 schedule with MTH 229 running M,W 2:30-3:20.
The Computer Science major requires up to MTH 232 (Calculus II); see the College Catalog for details.

Other recommended courses:

- (1) CSC 220: Computers and Programming (4 credits)
- (2) CSC 211: Intermediate Programming (4 credits)
- (3) Any course from the Required or Flexible Core in Pathways General Education
- (4) A science course. Computer Science requires three science classes, two of which need to be a sequence chosen from one of the following: General Biology I and II (BIO 170/171, 180/181); General Chemistry I and II (CHM 141/121, 142/127); General Physics I and II (PHY 120/121, PHY 160/161) or Space Science (AST 120/AST 160). The third science class can be any of these classes.

As a general note, you should plan to take Verrazano honors sections whenever possible.
